# OVERVIEW

Coincierge Club began as a cryptocurrency and application developed for the nightlife and physical gaming industries, offering phone support and hosting unlike any other altcoin on the market. This quickly evolved into a point of sale disruptor. Benefits include: safety, lower cost, hands on support, and metrics tracking.

Coincierge Club is going to change how a user purchases good and services. When the user is ready they download the application and import their crypto currencies or purchase Coincierge Club coins. At this point, human verification via one of our Coincierges follows. As an account member with a positive balance, you are entitled to 24/7 VIP Coincierge support. Our hosts can provide additional on the ground support as needed. The user is now able to use their crypto currencies at any venue that accepts the Coincierge Club application. When it comes time to execute the sale, the users scans a QR code provided by the venue, accepts the amount and hits send. The coins are now in the vendors account. We launched our application in Las Vegas on December 31st, 2017 allowing users to buy bottle service with cryptocurrency. Our goal is to replace over priced, under designed point of sale terminals.

---

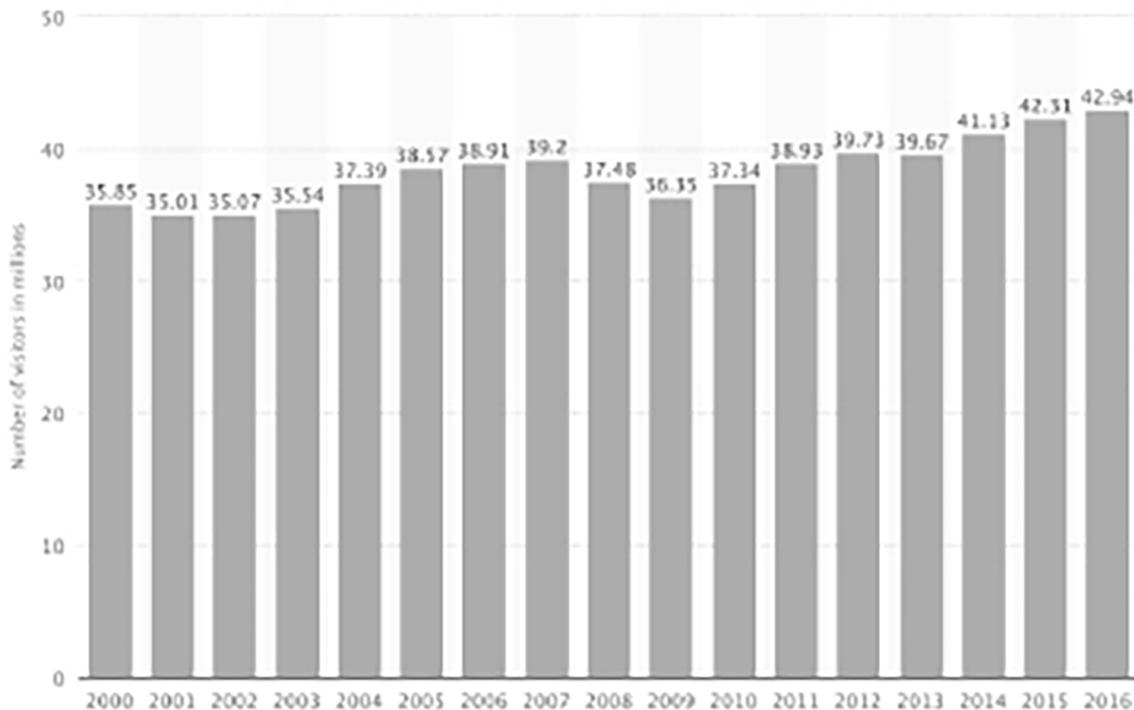

# OUR VISION

Our vision is simple, we want to make purchases safer, transactions quicker and the overall process cost less. We also want to offer white glove level service to any of our users, providing value not obtainable without paying a host, which can potentially be very dangerous and currently illegal without a promoter license in Nevada. Our overall vision is a paperless experience, where users transact with their phones directly with each vendor using blockchain technology.

# ECONOMY OF COINCIERGE CLUB

The success of Coincierge Club begins with the vendors that will use our technology and vendor portal. Currently we have 2 nightclubs, 1 strip club, 1 independent hosting company and 1 sports bar committed to accepting crypto payments via our application. Our Phase 1 roll out consisted of Light Nightclub, Chateau Nightclub and Sophia's Gentleman's Club. Phase 2 goal of our roll out is to have XS, Intrigue, Tao, Drai's, Marquee and Hyde ready to accept cryptocurrencies via our application, this will begin December 31st, 2017. Phase 3 will include Crazy Horse 3, Spearmint Rhino, Sapphire and Hustler integration by Memorial Day Weekend 2018. We anticipate full Las Vegas industry rollout by Labor Day Weekend 2018.

**Number of visitors to Las Vegas in the United States  
from 2000 to 2016 (in millions)**

# USER EXPERIENCE

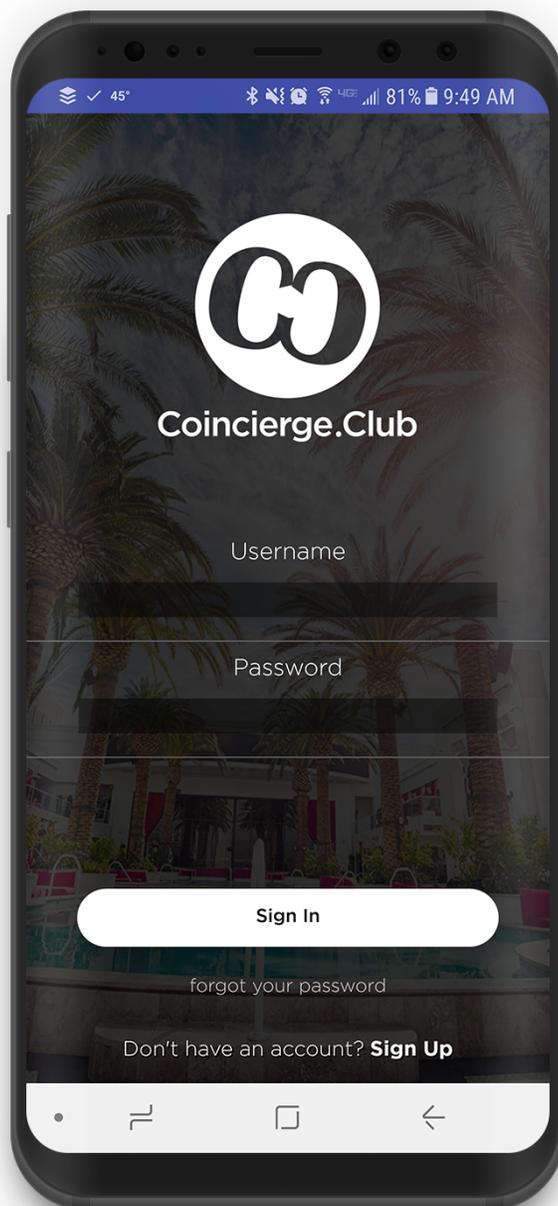

## CUSTOMER

Our application will be supported by the customers using it, who will prefer cryptocurrency to a traditional money exchange. Faster, safer and cheaper, Coincierge Club will allow a customer to spend more with the vendor. It will also allow them 24/7 Coincierge services available to help them plan any logistics needed. Customers can also get a personal host on the ground (Las Vegas) to make their trip even smoother. International customers will see additional savings by not needing to exchange their home currency.

It begins as the customer downloads the Coincierge Club application from either Google Play or Apple app store (coming soon). They will create a profile which will create new private and public keys or they can import their waves keys into the user profile area. They can buy Coincierge Club coins from inside of our application. The same packages discussed on the forum and advertised on the website can be purchased with the application.

(Coming soon)

---

# USER EXPERIENCE

## COINCIERGE TEAM

Our coin will be supported by our Coincierge team, who will receive their pay in our Coin, keeping everything on blockchain technology. We only choose experienced locals for our Coincierge Team who are eager to help out the customer in any way. They will also be able to receive gratuities from users via our application.

## HOST TEAM

Our coin is supported by our host team, who are excited to be able to offer exceptional services to their current and future clients via blockchain technology. We will seek host candidates that are either tired of dealing with the gaming board or can't qualify for a promoter license and thus, need our blockchain technology to take advantage of SB 398. These host will receive their commissions from their table sales in our coin as well as any potential gratuities from customers.

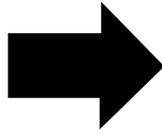

## CRYPTO TRADERS

Our coin will be available for trade on popular exchanges, and supported by traders who see the value in seasonal travel patterns (slow season vs busy season). The value will increase on major holiday or fight weekends due to value cap.

# ROADMAP

## OUR PAST, PRESENT, AND FUTURE

From humble beginnings developing a website and bitcoin faucet, to becoming an industry disrupter...We have come a long way and have no plans to stop.

### Q2 2017

Nevada SB 398 goes into effect, protecting businesses that operate on the blockchain from other government regulations, taxes or licenses

### Q3 2017

Crypto-Cash Hub launches. Faucet begins dispersing Bitcoin. Marketing begins, leading to 50K unique website visits in the first month.

### Q3 2017

Pre-ICO launches Aug. 29th with first VIP table brokered on blockchain technology. App beta testing resumes. Additional nightclub partnerships.

### Q1-Q3 2018

Solidify relationships at all major nightclubs, stripclubs, dayclubs, pools, bars, and music venues in Las Vegas. Expand to other major cities in the United States. Strategic marketing partners added.

### Q2 2017

Beta testing of Crypto Cash Hub Bitcoin faucet and forum to a select group. Concept of Coincierge Club developed.

### Q3 2017

Coincierge Club production begins. Application development begins. POS vendor solidified. Las Vegas nightclub partnerships begin.

### Q4 2017

Coincierge Club production begins.  
10/31 - Coincierge Club ICO Launches  
12/31 - Official Launch to Nightclubs  
12/31 - Coin Launches to Exchanges  
12/31 - App Available on Google Play

### Q4 2018 and Beyond

12/31/18 - Slot Machine Target Date  
Q3 2019 - Full Scale Casino Rollout  
Q3 2019 - Founders Coin Unfrozen  
Further Expansion Onward

# TECHNICAL

## THE APPLICATION

Our application development for android is done and our first iteration is now on the Google Play Store. It consists of a wallet, transactions page, QR scanner, account area, settings and a list of where the coin is accepted. The wallet can hold just under 10K different coins, and can move coins at speeds up to 250K transactions per second. The application allows for previous waves users to import their current public and private keys, or the user can create a new profile and those keys are generated for them. Currently 9518 devices are supported by our application.

We have 4 types of users: Admin, Host, Vendor, and Customer, each with a slightly unique style and function set. The vendor side is supported in the app as well as in web form. The app will allow users to sell their coins if they prefer. Our desktop site will take a back seat to the app, but for profile management and initial set up, some users might prefer the desktop version.

Features slated for later rollout include win/loss tracking, venmo style user to user transfers and proximity suggestions for verified vendors.

## CONCLUSION

Coincierge Club is the fastest technology available for sending currency, with speeds capable of over 3 times what Visa has recorded. This is the future of currency, allowing users to control their money and spend it freely without paying huge bank or credit card fees. Our team takes pride in what we have developed, and stand by our product.

Our team knows this will be an industry disruptor in the same way Uber was for transportation. We're excited to share this technology and experience with you, and hope you'll join us along for the ride.

- Coincierge Club Team
